

Lubricants and anti-friction agents Made in Italy

COMPANY PROFILE

Forget about friction
forever with **GLISS**®

Your favourite anti-friction agent

Carima is specialized in the production and sale of a wide range of lubricants and anti-friction agents for facilitating the laying of fibre optic and power cables.

Forget friction! With **GLISS**® and **S LUB** you save time and labour!

Located 20 Km from Milan, **Carima** is a European market leader in the production and formulation of water-based lubricants and anti-friction agents for the installation of fibre optic and power cables.

On an increasingly competitive market, **Carima** continues to grow thanks to the integrity and enthusiastic commitment of its team, the cornerstones of a company boasting thirty years' experience in the business.

Its work commitment, research and development have enabled **Carima**, to expand and adapt to ever evolving domestic and international markets.

Carima satisfies its customers' requirements with innovative products and short lead times, in an on-going process of quality assessment and improvement.

Carima also cares about the environment.

This is why all of our products are water-based and contain no oil derivatives.

All the electricity we need is supplied by the sun.

Photovoltaic panels, have been installed on our shed roofs and they power our everyday business activities.

Visit our website fv.carima.biz where you may consult our constantly updated daily production figures.

Our production lines:

- ✓ Anti-friction agents for installing fibre optic and/or power cables
- ✓ Silicones gels for electrical insulation in mono or bi-component applications
- ✓ Cleaning solvents for cables and fibre optics
- ✓ Water or solvent-based tracing sprays
- ✓ Technical sprays
- ✓ Detergents for solar and photovoltaic panels
- ✓ Salts for enhancing soil conductivity in earthing systems
- ✓ Greases
- ✓ Connections for micro ducts
- ✓ Various accessories
- ✓ Mould release

Why so many products?

Why are so many products needed to solve an apparently simple problem? So many different types of anti-friction agents and lubricants?

The answer is simple and to the point.

Carima supports its customers by producing various types of products to suit the working methods of each installer.

So if a technician has always worked with a gel product, **Carima** is sure to have the right gel for him in its product range.

Carima does not wish to change the habits of technical installers but help them in their everyday activities.

Carima is able to offer an optimal solution for each requirement
