

Lubricants and anti-friction agents Made in Italy

Company Profile

Located 20 Km from Milan, **Carima** is a European market leader in the production and formulation of water-based lubricants and anti-friction agents for the installation of fibre optic and power cables.

On an increasingly competitive market, **Carima** continues to grow thanks to the integrity and enthusiastic commitment of its team, the cornerstones of a company boasting thirty years' experience in the business.

Its work commitment, research and development have enabled **Carima**, to expand and adapt to ever evolving domestic and international markets.

Carima satisfies its customers' requirements with innovative products and short lead times, in an on-going process of quality assessment and improvement.

Carima also cares about the environment. This is why all of our products are waterbased and contain no oil derivatives.

All the electricity we need is supplied by the sun.

Photovoltaic panels, have been installed on our shed roofs and they power our everyday business activities.

Visit our website fv.carima.biz where you may consult our constantly updated daily production figures.

Our production lines

Anti-friction agents and lubricants

Specific anti-friction agents & lubricants to ease fibre optic and power cable installation. Specially designed to reduce the friction generated when laying power and fibre optic cables in pipes

Electrical insulation products

Mono and bi-component electrical insulation products

Solvents and detergents

Solvents and detergents to remove sealing grease (jelly) from cables, and to clean fibre cables before splicing

Spray products

Technical water-based spray & paint tracing products for habitual operations

Accessories

Sundry accessories to use our products easily and most effectively

Special products

Products of our design, to meet special needs

Chemical products

Chemical products developed by us, produced and sold for different sectors compared to our traditional ones

Why so many products?

*Why are so many products needed to solve an apparently simple problem?
So many different types of anti-friction agents and lubricants?*

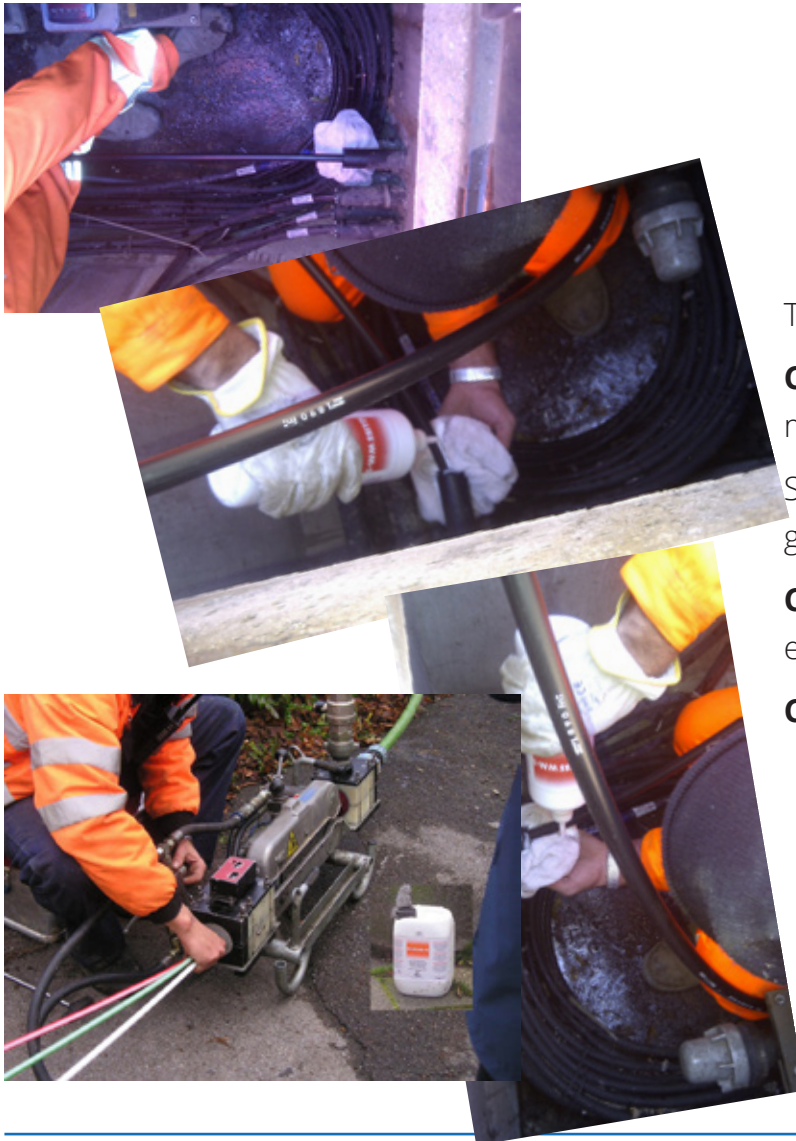

The answer is simple and to the point.

Carima supports its customers by producing various types of products to suit the working methods of each installer.

So if a technician has always worked with a gel product, **Carima** is sure to have the right gel for him in its product range.

Carima does not wish to change the habits of technical installers but help them in their everyday activities.

Carima is able to offer an optimal solution for each requirement

Carima worldwide

Certifications

On the customer's request, we supply conformity certificates.

All our products are marked with a batch number for perfect traceability.

Carima is very attentive to regulatory norms, and in particular guarantees that the products used comply with REACH and CLP.

Standards Product formulations remain stable in the course of time both at high and low temperatures.
